made lovingly by hand*

## Welcome to Cast 'a' Pet

Specialists in Pet Castings. We create beautiful timeless keepsakes of your pet's paws, hooves or nose, capturing every tiny detail. Each piece is unique to your pet, and made lovingly by hand, within our small family run business.

We have many years of expertise and have worked with hamsters all the way through to horses! We take great care of your pets and they are in safe and experienced hands whilst we take their cast.

We offer casts in a variety of finishes including Cold Metals, Coloured Resin or Painted Stone Plaster, which can be mounted or framed. Both 2D and 3D options are available.

If you have a unique idea in mind for your cherished pet, we can create a bespoke keepsake cast for you! Please contact us for more information.

## Loss of your pet

Losing a Pet is heart-breaking, and we specialise in capturing memorial casts of your pets that have passed away to preserve a precious memory. We create detailed paw, hoof and nose casts for you to have a timeless keepsake to remember them. Each pet is treated sensitively with care and love.

We work with Rainbow Bridge Pet Crematorium, if your pet is being cremated there we will carefully cast your pet's paw or nose prior to their cremation once you have said your final goodbye to them. If you are not having your pet cremated at Rainbow Bridge, we can take your pets casting from your home within 72 hours of your pets passing. If longer time has passed, please contact us and we will endeavour to do our best to help out. We understand this will be a very emotional time for you.

## The Process

Pets that have passed are treated with dignity and love during the casting process. For pets that have not passed, the process is completely painless, using skin safe products! Most pets are happy to have their paws and hooves cast, especially for a few of their favourite treats! It doesn't take long and once finished we will have a perfect mould of your pet ready to turn into your finished cast! The process takes 6-8 weeks once we have the mould.
